Health Care Survey On the Way for Select Beneficiaries

The Department of Defense wants to know what you think about your health care. Randomly selected beneficiaries throughout the TRICARE Europe region may soon receive the “2002 Health Care Survey of DoD Beneficiaries Questionnaire” in the mail. By answering the survey questions, beneficiaries will provide important information that will help improve health care services for the entire military community. Since only a few beneficiaries are sent this survey, recipients are urged to take the time to complete and return it. Survey responses will be kept secure, anonymous, and confidential.
